Fixing Your Hippo
If a head pops off, simply reattach it as shown in Figure 3. If a body pops off, reattach it as shown below in Figures 7A through 7C.

7A. Turn Hippos body upside down and attach neck to tail base as shown.

7B. First, hold neck in place and turn Hippo right side up.

7C. Then, snap Hippo back onto base as shown. Make sure neck stays attached inside Hippo.
HOW TO PLAY

Beginner's Game:
1. Select a Hippo and place 5 marbles into the marble release area near your Hippo (see Figure 2C). All players do the same.
2. One player is chosen to release a marble by pressing the marble release lever (see Figure 1). As soon as the marble is released, all players try to make their Hippos gobble it by pressing the Hippo tails until someone succeeds.

**Note:** The Hippo tail must be pressed down all the way and released all the way for the Hippo to gobble marbles properly.

3. The next player (moving in a clockwise direction) releases a marble and the process is repeated.
4. After all the marbles have been gobbled, each player counts up the marbles in his or her marble collecting area (see Figure 4).

**The player who captured the most marbles wins the game!**

Advanced Game:
Here's another exciting, frantic way to play! All players release their marbles at the same time and attempt to gobble as many as they can at the same time. After all the marbles have been gobbled, players count up their marbles.

**The player with the most marbles wins the game!**

RE-STORAGE:
To store your game, remove the Hippo attachments from the game base by lifting them up and out. Before putting them in the box, lock each Hippo neck in place by pressing the tail down and pulling the head up. Place the game base in the box bottom, followed by the hippo attachments, and marbles on top. Close the cover for easy storage.
