**Starting and Finishing the Game**

Decide who goes first by consulting goat entrails or the flights of birds or rolling dice or whatever other method you choose.

Play proceeds in turns, each with several phases (see p. 2). When the first player finishes his turn, the player to his left takes a turn, and so on.

The first player to reach 10th level wins . . . but you must reach 10th level by killing a monster, unless a card specifically allows you to win another way.

**Conflicts Between Cards and Rules**

This rulesheet gives the general rules. Cards may add special rules, so in most cases when the rulesheet disagrees with a card, follow the card. However, ignore any card effect that might seem to contradict one of the rules listed below unless the card explicitly says it supersedes that rule!

1. Nothing can reduce a player below Level 1, although card effects might reduce a player’s or a monster’s combat strength (p. 2) below 1.
2. You go up a level after combat only if you kill a monster.
3. You cannot collect rewards for defeating a monster (e.g., Treasure, levels) in the middle of a combat. You must finish the fight before gaining any rewards.
4. You must kill a monster to reach Level 10.

Any other disputes should be settled by loud arguments, with the owner of the game having the last word. You could also read the Munchkin FAQ and errata pages at www.worldofmunchkin.com, or start a discussion at forums.sjgames.com . . . unless it’s more fun to argue.
**TURN PHASES**

At the start of your turn, you may play cards, switch items from “in use” to “carried” or vice versa, trade items with other players, and sell items for levels. When your cards are arranged the way you want, go to phase 1.

1. **Kick Open The Door:** Draw one card from the Door deck and turn it face up.
   - If it’s a monster, you must fight it. See **Combat**. Resolve the combat completely before you go on. If you kill it, go up a level (or two, for some especially nasty monsters!) and take the appropriate number of Treasures.
   - If the card is a curse – see **Curses**, p. 6 – it applies to you immediately (if it can) and is discarded.
   - If you draw any other card, you may either put it in your hand or play it immediately.

2. **Look For Trouble:** If you did NOT draw a monster when you first opened the door, you now have the option of playing a monster (if you have one) from your hand and fighting it, just as if you had found it when you kicked open the door. Don’t play a monster you can’t handle, unless you’re sure you can count on getting help!

3. **Loot The Room:** If you did not find a monster by kicking open the door and you did not Look For Trouble, you loot the room . . . draw a second card from the Door deck, face down, and place it in your hand.
   - If you met a monster but ran away, you don’t get to loot the room.

4. **Charity:** If you have more than five cards in your hand, you must play enough of them to get down to five, or give the excess to the player with the lowest Level. If players are tied for lowest, divide the cards as evenly as possible, but it’s up to you who gets the bigger set(s) of leftovers. If YOU are the lowest or tied for lowest, just discard the excess.
   - It is now the next player’s turn.

**COMBAT**

To fight a monster, compare its combat strength to yours. Combat strength is the total of Level plus all modifiers – positive or negative – given by items and other cards. If the monster’s combat strength is equal to yours, or greater, you lose the combat and must Run Away – see below. If your combat strength totals more than the monster’s, you kill it and go up a level (two levels for some big monsters). You’ll also get the number of Treasures shown on its card.

Sometimes a card, or a Class or Race power, will let you get rid of the monster without killing it. This is still “winning,” but you don’t get a level. Sometimes, depending on the card, you might not get the treasure, either.

Some monster cards have special powers that affect combat – a bonus against one Race or Class, for instance. Be sure to check these.

One-shot items, such as potions, may be played directly from your hand during combat. You can also use one-shot items that you already had in play. *One-shot items say “Usable once only.” Discard these cards after the combat, whether you win or lose.*

Some Door cards may also be played into a combat, such as monster enhancers (see p. 5).

While you are in combat, you cannot sell, steal, equip, unequip, or trade items, or play items (except for one-shots) from your hand. Once you expose a monster card, you must resolve the fight with your equipment as it stands, plus any one-shot items you choose to play.

Discard the monster card, including any enhancers and one-shot items played, and draw treasure (see p. 3). But note: someone may play a hostile card on you, or use a special power, just as you think you have won. When you kill a monster, you must wait a reasonable time, defined as about 2.6 seconds, for anyone else to speak up. After that, you have really killed the monster, and you really get the level(s) and treasure, though they can still whine and argue.

**FIGHTING MULTIPLE MONSTERS**

Some cards (notably Wandering Monster) allow your rivals to send other monsters to join the fight. You must defeat their combined combat strengths. Any special abilities, such as forcing you to fight with your Level only, apply to the entire fight. If you have the right cards, you can eliminate one monster from the combat and fight the other(s) normally, but you cannot choose to fight one and run from the other(s). If you eliminate one with a card or your Race or Class power, but then run from the other(s), you don’t get any Treasure!

**ASKING FOR HELP**

If you cannot win a combat on your own, you may ask any other player to help you. If he refuses, you may ask another player, and so on, until they all turn you down or someone helps. Only one player can help you, adding his combat strength to yours. Anyone can play cards to affect your combat, however!

You can bribe someone to help. In fact, you’ll probably have to. You may offer your helper any Item(s) you are currently carrying, or any number of the Treasure cards the monster has. If you offer him part of the monster’s treasure, you must agree whether he picks first, or you pick first, or whatever.
The special abilities or vulnerabilities of the monster also apply to your helper, and vice versa. For instance, if a Warrior helps you, you will win if your combined total ties that of the monster, and he can Berserk and discard cards to add to his combat strength (but only once per combat, not once per monster). If you are facing Grendel and a Dwarf helps you, the monster’s combat strength is reduced by 3 (unless you are also a Dwarf). But if you are facing Pluto and a Cleric helps you, he is able to use his Turn Undead ability to give bonuses to your side.

If someone successfully helps you, the monster is slain. Discard it, draw treasure (see below), and follow any special instructions on the monster card. You go up a level for each slain monster. Your helper does not go up . . . unless he’s an Elf, in which case he also gains one level for each monster slain. You draw the Treasure cards, even if it was your helper’s special ability that defeated the monster.

Interfering With Combat
You can interfere with others’ combats in several ways:

Use a one-shot item. You could help another player by casting a potion against his foe. Of course, you can “accidentally” hit your friend with the potion, and it will count against him.

Play a card to modify a monster. These cards (usually) make a monster stronger . . . and give it more treasure. You can play these either during your own combats or during someone else’s combat.

Play a Wandering Monster along with a monster from your hand to join any combat.

Backstab a player in combat, if you’re a thief.

Curse them, if you have a Curse card.

Running Away
If nobody will help you . . . or if somebody tries to help, and your fellow party members interfere so the two of you still cannot defeat it . . . you must run away.

If you run away, you don’t get any levels or treasure. You don’t even get to Loot the Room. And you don’t always escape unharmed . . .

Roll the die. You only escape on a 5 or better. Some magic items make it easier or harder to run away. And some monsters are fast, and give you a penalty to your roll.

If you escape, discard the monster. You get no treasure. There are usually no bad effects . . . but read the card. Some monsters hurt you even if you get away from them!

If the monster catches you, it does Bad Stuff to you, as described on its card. This may vary from losing an item, to losing one or more levels, to Death.

If two players are cooperating and still can’t defeat the monster(s), they must both flee. They roll separately. The monster(s) CAN catch them both.

If you are fleeing from multiple monsters, you roll separately to escape each one, in any order you choose, and suffer Bad Stuff from each one that catches you as soon as it catches you.

Discard the monster(s).

Death
If you die, you lose all your stuff. You keep your Class(es), Race(s), and Level (and any Curses that were affecting you when you died) – your new character will look just like your old one. If you have Half-Breed or Super Munchkin, keep those as well.

Looting The Body: Lay out your hand beside the cards you had in play. Starting with the one with the highest Level, each other player chooses one card . . . in case of ties in level, roll a die. If your corpse runs out of cards, tough. After everyone gets one card, the rest are discarded.

Dead characters cannot receive cards for any reason, not even Charity, and cannot level up.

When the next player begins his turn, your new character appears and can help others in combat . . . but you have no cards.

On your next turn, start by drawing four cards from each deck, face-down, and playing any legal Race, Class, or Item cards you want to, just as when you started the game. Then take your turn normally.

Treasure
When you defeat a monster, either by killing it or using a card to eliminate it, you get its Treasure. Each monster has a Treasure number on the bottom of its card. Draw that many treasures. Draw face-down if you killed the monster alone. Draw face-up, so the whole party can see what you got, if someone helped you.

Treasure cards can be played as soon as you get them. Item cards can be placed in front of you. “Go Up a Level” cards can be used instantly. You may play a “Go Up a Level” card on any player at any time.

Character Stats
Each character is basically a collection of weapons, armor, and magic items, with three stats: Level, Race, and Class. For instance, you might describe your character as “7th-Level human Warrior with the Staff of Asclepius, a Digital Cloak, and Glass Slippers.”

Your character’s sex starts off the same as your own.

Level: This is a measure of how generally buff and studly you are. When the rules or cards refer to your Level, capitalized, they mean this number.
Example of Combat, With Numbers and Everything
Diane is a 5th-Level Cleric with the Feathered Headdress (which gives her +4 to her combat strength). She kicks open the door and finds Slender Man, a Level 12 Undead monster. Diane is only at 9 combat strength, so she’s losing.

Diane: Sorry, gang, but I gotta uncork this.
She plays the Potion of Sphinx Stinx, adding +5 to her combat strength. Now she’s winning, 14 to 12.
Sam: Surprise! He’s the Titalic Slender Man.
Sam plays Titanic, adding 10 to Slender Man’s combat strength. Now he’s winning, 22 to 14.
Diane: EEK! Lucky for me that he’s Undead . . . turn, turn, turn!
Diane discards one card from her hand and two Items she wasn’t using from the table to activate the Cleric class’s Turn Undead ability. Each discard gives her +3, for a total of +9, so now she’s barely winning, 23 to 22.
Diane: Anyone else?
She holds a Door card from her hand and stares menacingly at the group. Although Sam has an Undead monster, Cerberus, in his hand, he decides not to add it to the fight.
Diane: Awesome! Thanks for the extra Treasures, Sam!
Sam: Grumble.
Diane goes up one level for killing Slender Man, taking her to 6th Level. She draws five Treasures face down: three from Slender Man himself, and two more from the Titanic monster enhancer.
And the game goes on . . .

Race: Characters may be Humans, Elves, Dwarves, or Halflings. If you have no Race card in front of you, you are human. Humans have no special abilities. Each other Race has special abilities (see the cards). You gain the abilities of a Race the moment you play its card in front of you, and lose them as soon as you discard that card.

Some Race abilities are powered by discards. You may discard any of your cards, in play or in your hand, to power a special ability.

You can discard a Race card at any time, even in combat: “I don’t wanna be an elf anymore.” When you discard a Race card, you become human again.

You may not belong to more than one race at once unless you play the Half-Breed card. You may not have two copies of the same Race card in play.

Class: Characters may be Warriors, Wizards, Thieves, or Clerics. If you have no Class card in front of you, you have no class. Yeah, I know, we did that one already.

Each Class has special abilities, shown on the cards. You gain the abilities of a Class the moment you play its card in front of you, and lose them as soon as you discard that card. Some Class abilities are powered by discards. You may discard any card, in play or in your hand, to power a special ability.

See the Class cards for when abilities can be used. Note that a Thief cannot steal while he or the target is fighting – and as soon as a monster is revealed, the fight is on!

You can discard a Class card at any time, even in combat: “I don’t wanna be a wizard anymore.” When you discard a Class card, you become classless until you play another Class card.

You may not belong to more than one class at once unless you play the Super Munchkin card. You may now have two copies of the same Class card in play.

ITEMS

Each Item card has a name, a power, a size, and a value in Gold Pieces.

An item card in your hand does not count until you play it; at that point, it is “carried.” You may carry any number of small items, but only one Big one. (Any item not marked Big is considered Small.) You may not simply discard one Big item to play another; you must sell it, trade it, lose it to a Curse or Bad Stuff, or discard it to power a Class or Race ability.

If something lets you have more than one Big item (for instance, the Dwarf race) and you lose that ability, you must either correct the problem immediately or get rid of all but one Big item. If it’s your turn and you’re not in combat, you can sell the excess Big items (as long as you have at least 1,000 Gold Pieces of items to sell). Otherwise, you must give them to the lowest-Level player(s) who can carry them! If any Big items are still left over, discard them.
Any item can be traded, but some items have use restrictions: for instance, the Golden Fleece can only be born by a Thief. Its bonus only counts for someone who is, at the moment, a Thief.

Likewise, you may also use only one headgear, one suit of armor, one pair of footgear, and two "I Hand" items (or one "2 Hands" item)... unless you have a card that lets you ignore these limits. If you are carrying two Headgear cards, for instance, only one of them can help you.

You should indicate items that can’t help you, or extras not being worn, by turning the cards sideways. You may NOT change your used and carried items during a combat or while running away. You cannot discard Item cards “just because.” You may sell items for a level, or give an item to another player who wants it. You may discard to power certain Class and Race abilities. And a Curse may force you to get rid of something!

Trading: You may trade Items (but not other cards) with other players. You may only trade Items from the table—not from your hand. You may trade at any time except when you’re in combat—in fact, the best time to trade is when it’s not your turn.

Any Item you receive in a trade must go into play; you can’t sell it until it’s your turn.

You may also give Items away without a trade, to bribe other players—“I'll give you Excalibur if you won’t help Jill fight Loki!”

You may show your hand to others. Like we could stop you.

Selling Items for Levels: During your turn, you may discard items worth at least 1,000 Gold Pieces and immediately go up one level. If you discard (for instance) 1,000 Gold Pieces worth, you don’t get change. But if you can manage 2,000 Gold Pieces, you can go up two levels at once, and so on. You may sell items from your hand as well as those you are carrying. You may not sell Items to go to Level 10.

**WHEN TO PLAY CARDS**

A quick reference guide...

**MONSTERS**

If drawn face-up during the “Kick Open The Door” phase, they immediately attack the person who drew them.

If acquired any other way, they go into your hand and may be played during “Looking For Trouble,” or played on another player with the Wandering Monster card.

Each Monster card is a single monster, even if the name on the card is plural.

**Undead Monsters**

Several monsters in this set are tagged Undead. You may play any Undead monster from your hand into combat to help any other Undead, without using a Wandering Monster card. If you have a card that can be used to make a monster Undead, you may play it with a non-UEndead monster to use this rule.

**MONSTER ENHANCERS**

Certain cards, called monster enhancers, raise or lower the combat strength of individual monsters. (Yes, you can have a negative enhancement.) Monster enhancers may be played by any player during any combat.

All enhancers on a single monster add together. If there are multiple monsters in a combat, the person who plays each enhancer must choose which monster it applies to.

**ITEMS - PLAYING THEM**

Any Item card may be played to the table as soon as you get it, or anytime on your own turn other than in combat (unless the card itself says otherwise).

**ITEMS - USING THEM**

Any one-shot Item can be played during any combat, whether you have it in your hand or on the table. (Some one-shot items, such as the Wishing Ring, may also be used outside of combat.)

Other Items stay on the table in front of you once they are played. You may keep Items in front of you that you cannot currently use (because of your Class or Race, or because you’re already using other Items of that type). Turn these Items sideways. These Items are “carried” but not “in use.” Exception: You may have only one Big item in play at a time unless you have a Class or card that will let you use more.

**OTHER TREASURES**

Other Treasure cards (like Go Up a Level cards) are “specials.” You may play these at any time, unless the card itself says otherwise. Follow the card’s instructions, then discard it, unless it has a persistent bonus like an Item.

**CURSES**

If drawn face-up, during the “Kick Open The Door” phase, Curse cards apply to the person who drew them.

If drawn face-down or acquired some other way, Curse cards may be played on any player at any time. ANY time, do you hear me? Reducing someone’s abilities just as he thinks he has killed a monster is a lot of fun.

Usually, a Curse affects its victim immediately (if it can) and is discarded. However, some Curses give a penalty later in the game or have a continuing effect. Keep these cards until you get rid of the Curse or the penalty takes effect. If someone plays a “your next combat” Curse on you while you are in combat, it...
counts in *that* combat! (Curse cards you keep as a reminder may not be discarded to power Class or Race abilities. Nice try!)

If a Curse can apply to more than one Item, the victim decides which Item is lost or Cursed.

If a Curse applies to something you don’t have, ignore it unless the Curse has instructions to the contrary. For instance, if you draw De-Feet-ed and you are not wearing Footgear, nothing happens; discard the card.

There will be times when it will help you to play a Curse or Monster on yourself, or to “help” another player in a way that costs him treasure. This is very munchkinly. Do it.

**Classes and Races**

These cards may be played to the table as soon as they are acquired, or at any time during your own turn. The same is true for Super *Munchkin* and Half-Breed, but you must already have a Class to play *Super Munchkin* or a Race to play Half-Breed.

**More Munchkin!**

Visit www.worldofmunchkin.com for news, errata, updates, Q&A, and much more. To discuss *Munchkin* with our staff and your fellow munchkins, visit our forums at forums.sjgames.com. Check out www.worldofmunchkin.com/resources.html for reference cards, play mats, and dozens of links.

The icon for this set is 🌾

---

**Super-Sized Munchkin**

Studies have shown that 8.4 out of 9.7 *Munchkin* players just can’t get enough of the game. Here are some ideas to take your *Munchkin* games to new heights – or lows:

**Combining different *Munchkin* sets.** There are lots of different *Munchkin* sets: zombies, pirates, superheroes, vampires, and more. You can combine two (or more) sets for a genre-crossing mega-*Munchkin* adventure! Space plus Old West? Kung fu spies? No problem! See it all at sets.worldofmunchkin.com.

**Expansions.** These add still more monsters to kill, new Treasure to loot, and sometimes entirely new kinds of cards.

Ask for all the *Munchkin* sets and expansions at your local game or comic store – find it using our Store Finder, gamerfinder.sjgames.com – but if you don’t have a local store, we’ll be happy to sell them directly to you at www.warehouse23.com.

**Turn it up to EPIC!** Playing to Level 10 just isn’t enough for some people. To satisfy their insane cravings, we’ve created Epic *Munchkin*, a new set of rules that gives all your *Munchkin* sets that high-octane boost you need to make it up to Level 20! Look for it on our online PDF store, e23.sjgames.com – it’s completely, absolutely FREE!

**Faster Play Rules**

For a faster game, you can add a “phase 0” called Listen At The Door. At the start of your turn, draw a face-down Door card, which you may play or not. Then arrange cards and Kick Open The Door normally. If you Loot The Room, draw a face-down Treasure, not a Door.

You can also allow shared victories – if a player reaches Level 10 in a fight where he had a helper, the helper also wins the game, no matter what Level he is.
