GAME OVERVIEW

Summit is a survival game in which players attempt to ascend and descend a deadly mountain either competitively, cooperatively or solo.

CONTENTS

(1x) RULE BOOK
(1x) DUAL-SIDED GAME BOARD
(1x) BLIZZARD MARKER
(1x) TIME OF DAY MARKER
(6x) ACTIVE PLAYER TOKENS
(2x) DICE
(1x) WEATHER DIE
(1x) EVENT DIE
(6x) CHARACTER MATS
(6x) MOUNTAINEERS
(6x) KARMA MARKERS
(42x) MARKER CUBES
(72x) TOKENS
(5x) NUMBERED ITEM
(24x) FLAG
(13x) OXYGEN
(30x) EVENT
(90x) TILES
(2x) BASE CAMP
(2x) HALFWAY CAMP
(2x) SUMMIT
(28x) NEUTRAL
(28x) ICE
(28x) THIN AIR
(200x) CARDS
(6x) QUICK REFERENCE
(20x) CO-OP EVENT
(34x) ITEM
(69x) KARMA
(71x) EVENT

OBJECTIVES

Competitive Mode

To race from the Base Camp to the Summit and back.
To score as many points as possible. Points can be scored at four different checkpoints on the mountain: when Mountaineers arrive at the Halfway Camp ascending, the Summit, the Halfway Camp descending, and the Base Camp. Points are also scored at Game End, according to position on the Karma Track.

Cooperative/Solo Mode

A minimum of one player must survive the trek from the Base Camp to the Summit and back, or the expedition is considered a failure.
Players may choose to score their games using the point system described in “Game End” (page 9).
SETUP FOR ALL GAME MODES (Tweaks on page 3)

1. Decide on the mode of play, then lay the game board in the middle of the table.
   For a competitive game use the side with the Karma Track. Setup tweaks are marked with this symbol:.
   For a cooperative or solo game use the side with the Sherpa Track. Setup tweaks are marked with this symbol:.

2. Before beginning, decide on the difficulty setting.
   From easiest to hardest, the levels are: Chill, Trying, Risky, Reckless, and Legendary. As the difficulty increases, the height of the mountain, the play time, and the blizzard’s starting severity all increase.

3. Place the Blizzard Marker on the Blizzard Track next to your chosen difficulty.

4. Place the Item Number Tokens on their corresponding spaces on the Item Slots on the left-hand side of the board.

5. Place the Event Die, Weather Die, an Active Player Token, and all remaining tokens faceup next to the board.

6. Place the center of the Base Camp tile(s) on the board, on the line of your chosen difficulty.
   For 1 to 3 players, use one centered Base Camp tile. For 4 to 6 players, use two off-centered Base Camp tiles.

7. Place the Summit tile at the peak of the mountain.
   For 1 to 3 players, use the narrow Summit.
   For 4 to 6 players, use the wide Summit.

8. Mix the triangular tiles and deal 3 to each player to create their Tile Hand. With the remaining tiles, create a Tile Stack, facedown, within reach of all players.
   Tile Hands are kept secret in a competitive game, and can be shown while playing a cooperative game.

9. Shuffle the Event Cards and place them facedown next to the board within reach of all players.
   For an easier game, shuffle in the 6 “Sunny Days” Event Cards, which are marked with on the lower left-hand side.

10. Players randomly choose their Character Mat and matching coloured pieces (Mountaineer, Karma Marker, 4 Flag Tokens and 7 Marker Cubes).
    Unused Character Mats and their matching coloured pieces are returned to the box.

11. Each player puts their Mountaineer on a tent on a Base Camp tile.
    In a game with 4 to 6 players, Mountaineers can start at and return to either camp.

12. Deal out Item Cards as per the mode of play, then shuffle any remaining Items back into the Item Deck, and place it facedown next to the other stack(s).
    On your first few attempts, deal from the 18 starting Items (marked with ).
    Players place their Items faceup next to their Character Mat and add up the of their Item(s). Each player moves their Marker Cube on their Character Mat an equal number of squares to the right on the Track.

13. Game mode dependent.
    (See opposite page.)

It is recommended that players use a Quick Reference Card to help them during their first few games.

We recommend that you play your first game on “Trying” or “Chill.” This will allow you to learn the ropes and get a feel for the dangers of the mountain.
Also, until you’ve played a few times, remove the 5 Event Cards from the Event Stack (they are marked on the lower left-hand side).
### Competitive Tweaks

6. Place the center of the Halfway Camp tile(s) on the board on the line of your chosen difficulty.

For an easier game, use two Halfway Camps set at the same difficulty level.

9. Shuffle the Karma Cards and place them facedown next to the Event Stack, within reach of all players. Deal each player 4 Karma Cards to create their Karma Hand.

For a more deadly game, shuffle in the 6 “Aggression Pack” Karma Cards, which are marked with on the lower left-hand side.

11a. Each player places their Karma Marker on the space marked 5 on the Karma Track, and returns 2 cubes to the box.

12a. Shuffle and deal out 3 Item Cards to each player. Each player may choose 0 or 1 card, and then passes the remaining to the left. Then each player chooses 0 or 1 of those cards and discards the remainder. When finished, players may have 0, 1 or 2 Items.

13a. Players place their 4 Flag Tokens next to the Position Track for position scoring during the game.

### Cooperative/Solo Tweaks

5a. The Event and Item Decks will need to be changed depending on the mode of play. For easier sorting, Competitive and Cooperative cards have a or on the lower right-hand side. Cards without either icon are used in all game modes. For a Cooperative game, ensure all cards are included and all cards removed. For a Cooperative/Solo game, ensure all cards are included and all cards removed.

11b. Each player places two Marker Cubes on their colour-coded Sherpa Track: one on the 6 under and one on the 11 under and returns their Karma Marker and 3 of 4 Flag Tokens to the box.

There is no Halfway Camp or Karma Cards in the cooperative game. Those tiles and cards remain in the box.

12b. Draw and place faceup 4 times as many Item Cards as there are players. When players are choosing Items, they may discuss and take them in any order to maximize their use and decide whose Sherpa is carrying which Item(s). See “Sherpas” below. When finished, players and their Sherpa may each have 0, 1 or 2 Items.

For solo play, draw 8 Items, choose up to 6, and use 2 Sherpas.

13b. Players decide at what time they want to start their ascent by setting the Time of Day Marker to the agreed-upon hour on the Time of Day Track.

At night (19:00 to 04:00), players’ is halved, rounded down, then any bonuses from Items are applied. After each round (when each player has had a turn), advance the Time of Day Marker 1 hour.

### Sherpas

Sherpas do not use or nor do they have markers on the board. They are always considered to be with their matching player’s Mountaineer.

A Sherpa can never use an Item. A player’s weight is not affected by anything carried by a Sherpa. Items carried by a Sherpa are not considered equipped, and players cannot use them until they have taken and equipped them.
Reading the instructions for the first time? Take out a Character Mat and 5 cubes, and run through these steps as you read. Or check out the Fast Play Setup on page 11.

CHARACTER MATS

Players prepare their Character Mats by placing one of their coloured cubes in each of the squares marked with the starting symbol 🟢.

All players start with zero 🍦 (Food), 🟡 (Oxygen) and 🟤 (Weight), and maximum 🟠 (Health) and 🟣 (Movement).

After taking into account Item weight, either at the same time or one by one, players decide how much 🍦 and 🟡 they will carry and mark those supplies by moving the corresponding Marker Cubes on their Character Mat.

For every 🍦-icon that is passed on the 🍦 or 🟡 track, move the 🟤 Marker Cube one square in the same direction on the 🟤 track.

Players cannot carry more 🍦 than squares in their 🍦 track, which means they may have to limit supplies or Items carried.

Next, for each 🍦-the 🍦 Marker Cube has passed as their 🍦 increased, players must move their 🍦 Marker Cube one square in the same direction on the 🍦 track.

So as players carry more supplies, they become heavier and move slower. And as they use supplies, they become lighter and move faster.

Note: The tracks are laid out in such a way that when one cube is moved, any affected cubes are always moved in the same direction.

ITEMS

Although players may only start with a maximum of two Items, during the game players may have as many Items as they like, provided they have enough squares on their 🍦 track.

Items can be dropped, traded, or given to a Mountaineer sharing your tile, or who is on an adjacent tile.

When an Item is dropped, place that Item Card in an empty Item Slot on the side of the board. Then place the matching Item Number Token on the tile with the Mountaineer who dropped it. Other Mountaineers on or passing over that tile may pick up the Item on their turn. A player cannot drop and pick up the same Item on the same turn.

In the event all 5 Item slots are full and more cards need to be placed, discard the oldest Item from its slot and replace it (and its token’s location) with the new ones. The oldest Items were buried under snow and lost.

An Item is considered equipped when a player has it faceup next to their Character Mat. Items cannot be held in a player’s hand or concealed.

SUPPLIES

Food 🍦 and oxygen 🟡 are not considered Items.

Each time 🍦 or 🟡 is required and a player doesn’t have it, their 🍦 will drop by one square for each missing resource.

A player’s 🍦 and 🟡 can be traded or given to other Mountaineers on the same or adjacent tiles during either of their turns.

Throughout the game, as players track their changes and move Marker Cubes past 🍦 or 🟡, it will cause them to move each Marker Cube in the corresponding field in the same direction.

For example, as a player loses 🍦 or carries more 🟡, their 🍦 decreases. As they gain 🍦 or use/drop supplies, their 🍦 increases.

A player’s 🍦 can never exceed the maximum, and when the Marker Cube is removed from the last square on the 🍦 track the player is eliminated from the game and his/her Mountaineer is laid down on its current tile.

A player’s 🍦 can pass the maximum or minimum temporarily due to a card’s effect. However, a player cannot have negative 🍦.

Any changes to a player’s 🍦 immediately takes effect on their 🍦.

(Example: If a player enters a Thin Air tile, and using their 🟡 causes their 🍦 to drop, and the 🍦 decrease causes their 🍦 to increase, then they can move the extra space.) Just like picking up an Item mid-movement might slow them down.

Each of the 🍦, 🟡, and 🟤 Marker Cubes can be moved from a player’s supply levels to their starting squares (🟣) to show that they have none left.

If an Event Card or a Karma Card would cause a player to lose/discard an Item, that Item cannot be used retroactively. Just as a player could not play a Karma Card to retroactively affect an Item after its use.

Food 🍦 and oxygen 🟡 are not considered Items.
Once all players are ready, the player with the highest \( \mathbb{H} \), after taking into account Item bonuses, takes the Active Player Token and goes first. In the event of a tie, the oldest player (not Character) of the tied players goes first. Play progresses in a clockwise direction.

Play continues until all players have either returned to the Base Camp after summiting, or have been eliminated from the game. Players may skip the Halfway Camp ascending or descending, but cannot skip the Summit or Base Camp. Players who skip the Halfway Camp will not receive points on the position track for the skipped checkpoint. (Position scoring explained on page 6.)

Players may need to backtrack, including returning to a camp to resupply if the mountain or opponents are particularly nasty. If they return to Base Camp, and there are two Base Camps on the board, the player may choose to restart their trek at either camp.

First time playing? We suggest that no one uses Karma Cards until after everyone has played 1 or 2 turns and has learned the basics.

Active Player Token bonuses are only available in Cooperative/Solo modes.

The Active Player decides who wins in the case of an in-game tie, and if multiple players are affected at the same time, resolve the outcomes starting with the Active Player and moving clockwise.

Cooperative/Solo Tweaks

The team chooses which Active Player Token they would like to use for the game, as each has a unique one-time bonus, which can be applied upon team consensus.

CARABINER – All players may immediately move 2 trail points.

FLASK – All players, regardless of proximity, may ignore the \( \mathbb{H} \) once.

MED KIT – All players, regardless of proximity, may gain \( \mathbb{H} \).

ICE AXE – Player(s) may ignore movement caused by an Event.

SHOVEL – Players may remove one triangular tile in play regardless of type.

CAMERA – Game End points for Summiting are doubled.

Active Player Token bonuses are only available in Cooperative/Solo modes.

**TURN OVERVIEW**

1. First, you may do one of the following:
   - Move (up to your current \( \mathbb{H} \)) and place tiles as needed for your Mountaineer’s movement.
   - Skip movement, discard your entire Tile Hand, and draw up to your current hand limit.
   - Skip movement and attempt to remove a card or token from your Character Mat. (See “Removal” on page 7)
   - (See tweaks on right)

2. Then you must do each of the following:
   - Roll the Event Die and resolve the outcome.
   - Roll the Weather Die and resolve the outcome.
   - Draw new tiles up to your hand limit. (Standard Tile Hand size is 3.)
   - Pass the Active Player Token and the dice clockwise.

**Cooperative/Solo Tweaks**

1. Skip movement to take, give, or exchange supplies (food, oxygen, Items) with your Sherpa(s), in any available quantity.

**Competitive Tweaks**

Players may always choose to discard 1 Karma Card per turn to refresh their hand.

After drawing tiles, draw new Karma Cards up to your hand limit. (Standard Karma Hand size is 4)

Karma Cards can be played as indicated on each card, and players may play as many as they would like, but may refill their hand only at the end of their own turn.

If a player chooses to “skip movement” for any reason, it can only be skipped once per turn. So a player could not skip their movement to draw new tiles and attempt a removal or special ability requiring skipping movement.
Mountaineers will ascend and descend the mountain by following connecting ropes from one tile to the next, counting each trail point as 1 movement. Players are able to place new tiles onto the board by moving along a rope towards an empty area and connecting the rope with a tile from their Tile Hand.

Players cannot place tiles if they don’t immediately move onto them. A player’s rope must connect to a rope on the new tile, but they need not connect to another player’s nearby rope unless desired.

Players may use rope on any tile in play, but two players may not occupy the same trail point on a tile.

All tiles must connect short edge to short edge, or long edge to long edge. Never long to short.

Tiles are considered adjacent when their sides touch. Tiles touching only at a corner are not considered adjacent.

Tiles can only be placed in empty spaces on the board, not on top of other tiles.

If a player runs out of tiles, they cannot draw new tiles until the end of their turn.

If a player slides or falls, or is moved down the mountain and there are no more tiles to move onto, their movement stops on the farthest connected trail point.

To calculate distance for some card resolutions, count the number of trail points. In a tie, the Active Player decides.

Upside-down tiles cannot be traversed.

**NEUTRAL TILES** (Brown rope)
Create a trail with no side effects.

**ICE TILES** (Blue rope)
Contain more trail points to slow players down.

**THIN AIR TILES** (Yellow rope)
Cause players to use one ⬙ per Thin Air tile. If a player ends their turn, or skips their movement on a Thin Air tile, they do not need to use another ⬙ on their next turn unless they traverse another Thin Air tile, or exit and return to the current tile.

**MOVEMENT EXAMPLE**

Red has 4 ⬙, if they take the route up towards the ice tile they would have to stop after 3 trail points as they cannot share a trail point with Green.

If Red heads to the right, after moving 2 trail points they could add another tile and continue for the remainder of their movement, remembering to use ⬙ as they enter the Thin Air tile.

**CAMPS** Base & Halfway (See below for competitive scoring)

Whenever a player begins their turn at one of the camps, they may choose to skip their movement and chose one of three actions:

1. **Reload their supplies.** They may take as much ⬙ and ⬙ as they can carry and must adjust their ⬙ and ⬙ Markers accordingly. Camps have an unlimited supply of both resources and therefore can never run out.
2. **Draw up to 3 Item Cards.** They may keep as many Items as they can carry and then shuffle any remaining cards back into the Item Stack. They must adjust their ⬙ and ⬙ Markers accordingly.
3. **Gain up to 3 ⬙.** They must adjust their ⬙ Marker accordingly.

If there is room on the board, players may place tiles to descend past Base Camp but they will need to reconnect their ropes to the Base Camp tents to “return to camp.”

The Summit is the actual peak of the mountain, not the entire tile.

If a player has enough movement, they may reach the Summit and immediately begin their descent. They do not need to end their turn on the Summit.

With permission, players may pass over the occupied Summit.

The Summit is always a Thin Air tile and is not considered a camp!

**Competitive Tweaks – Position Track Scoring**

As soon as a player reaches a Camp sign or the Summit, they place one of their Flag Tokens on the wreath with the highest available points for that checkpoint – first place always being at the top of each level.

Just landing on a Camp tile or the Summit tile does not mean the player has reached that checkpoint.

Players do not need to end their turn on a checkpoint to score. They may pass over, score, and continue moving.
To remove a card/token from their Character Mat, a player must skip their movement and roll the Event Die. If a blank is rolled, the player may remove one card or token. If a blank is rolled, the token or card remains. Either way, the player has skipped their movement.

In this way, players may only remove tokens or cards from themselves. This roll does not count as or towards the Event Die roll required at the end of a player’s turn.

As players are using ropes to traverse the tiles, they must have permission, and enough rope, to pass each other ascending and/or descending the mountain. If the blocking player gives permission, they move up 1 level on the Karma Track (page 8). If the blocking player refuses, they move down 2 levels on the Karma Track and the current player must wait, take an alternate route, or use the “Passing” Karma Card.

Provided you have enough rope, permission can be asked for at any point during your turn, and once given cannot be denied during the same turn. The passed player does not gain Karma points until the Active Player’s Mountaineer physically passes theirs.

When players are being moved either by an Event or another player’s Karma Card, any blocking players cannot interfere with the movement, and therefore will not gain or lose points on the Karma Track.

The dice introduce some chaos into the game as the mountain gets a turn to affect the player(s). The dice can be rolled together, but the blue Event Die how many supplies they will need to use to stay healthy.

Roll at the end of each turn and take the following action:

**Event Die**
- Blank – Active Player does not draw an Event Card.
- – Active Player draws and resolves an Event Card.

**Weather Die**
- SUNNY DAY – Do not use any.
- LIGHT SNOW – Use . Move your marker one square to the left.
- HEAVY SNOW – Use . Move your marker two squares to the left.
- BLIZZARD – Raise the Blizzard Tracker level and check the severity of the blizzard. All players not in camp use as many as the current level dictates.

Players in camp must still roll both dice, but are not affected by the Weather Die. Even if all players are in a camp, if a BLIZZARD is rolled, the Blizzard Marker still moves up the Blizzard Track but players do not use the required .

Every time a BLIZZARD is rolled, the Blizzard Marker is moved up one level on the Blizzard Track and all players not in Camp are required to use as many and as the current level dictates.

For each missing or a player will lose 1 .

When the Blizzard Marker reaches all players are eliminated and any scores are added up.

Players in camp must still roll both dice, but are not affected by the Weather Die. Even if all players are in a camp, if a BLIZZARD is rolled, the Blizzard Marker still moves up the Blizzard Track but players do not use the required .

Use this token with the Blizzard Marker. Move them one at a time when the BLIZZARD is rolled. Players only pay blizzard cost when markers are both on the same level.
CARDS

If a card contradicts the rules, the card takes precedence.

When rounding a number is done in-game, it is rounded down.

If a draw stack is exhausted at any time, the discard pile is reshuffled to create a new draw stack.

Players may look through the discard piles at any time.

EVENTS - When an Event Card is drawn, the entire card is read aloud to all players, and then, if possible, the Event is resolved.

ITEMS - Item Cards give players a particular ability or bonus while they have or use them, but they also can have \( \text{\textbullet} \) that might slow players down. If a player wishes to equip an Item, it must be placed faceup next to their Character Mat to show that the Item is available to be used.

COMPETITIVE TWEAKS - KARMA CARDS

KARMA - Most Karma Cards will raise or lower a player’s Karma score as they interact with other players. Good deeds raise Karma, and evil deeds lower it. Karma Cards have symbols in the upper left-hand corner for quick reference. The Karma outcome for playing each card is listed next to its good/evil icon. Below that is a symbol of what the card is affecting. And below that, some cards have \( \text{\textbullet} \) which means it can be played anytime, even if the Active Player is not involved.

Most Karma Cards are played to affect a Target player, who is assigned when the card is played. If the word “Target” is used multiple times on a card, it refers to the original Target. If another Karma Card is played to cancel the card or redirect the Target, the card owner is not able to change their Target for a different outcome.

“Target(s)” means one or more players may be targeted.

Players cannot choose themselves as the Target unless the card specifically says they may. Or if the card is targeting another card.

A player may choose to not accept help from another player’s Item or a positive Karma Card targeted at them, but never a negative Karma Card. When a positive Karma Card is not accepted, the player who made the offer still receives the Karma outcome.

If a negative Karma Card is played, regardless of the effectiveness, that player suffers the Karma outcome. (For example, if you target a player and that player’s abilities do not allow it, you may still drop Karma levels.)

Some Karma Cards have different outcomes depending on the effect. The first choice/effect corresponds to the first number, and the second choice/effect corresponds to the second number.

COMPETITIVE TWEAKS - KARMA TRACK

When a Karma Card has “gain” or “lose” Karma, the number is counted by moving levels on the Karma Track. So a player might “gain 1 Karma” and move their Marker Cube from level 10 to level 12. Or a player might “lose 1 Karma” and move their Marker Cube from level 10 to level 9.

A player may always play positive Karma Cards, but cannot exceed the top level (12 points).

However, a player may not play a negative Karma Card, or refuse passage, if they are unable to drop the required Karma level(s).

There is a score jump between both the top 2 and bottom 2 levels; however, they are still considered 1 level apart.
RETURNING TO BASE CAMP AFTER SUMMITING

**Competitive Mode**
When a player returns to Base Camp they still roll and resolve both dice, then they immediately "fly home."
To "fly home," they remove their Mountaineer from camp, and discard both their Karma and Tile Hands.
The player can no longer affect (or be affected by) other players, but their Karma Marker and Flag Token(s) can still be affected until Game End.

**Cooperative/Solo Mode**
When a player returns to Base Camp, they must still finish their turn, including rolling both dice.
At the beginning of each subsequent turn, they must decide to either "fly home" or stay to support the team.
If a player stays, they play a turn as usual, and may load up supplies and/or items to bring up to help their teammates.
To "fly home," they remove their Mountaineer from camp, discard their Items and Tile Hand, and empty their Sherpa. A player who has flown home no longer has a turn, but will score during Game End scoring.

PLAYER ELIMINATION

Once a player has been eliminated, they no longer have to roll either die. If an Event Card eliminates a player they do not resolve their Weather Die roll.
Other players may pass the downed Mountaineer and may scavenge any remaining supplies or items that were on the eliminated player.

**Competitive Tweak**
If a player is eliminated on the mountain, their Flag Token(s) stay on the Position Track and their Karma Marker on the Karma Track, and they keep their Tile Hand and Karma Hand. They may continue to use their Karma Cards, but cannot draw new ones, as they will no longer have any "turns."

GAME END

**Competitive Mode**
Once the last player has returned to Base Camp and flown home, or perished on the mountain, the game ends. Players add up their points from the Position Track and the Karma Track.
Among all players, including any eliminated ones, whoever has the highest total score is the winner.
In the event of a tie, whichever of the tied players was the first to the Summit wins.

**Cooperative/Solo Mode**
Once the last player has returned to Base Camp and flown home, or perished on the mountain, the game ends. The team needs one member to have summited and survived to fly home for a team victory, and if desired, scoring.
Points are awarded at the end of each game:
5 POINTS – For each surviving team member.
3 POINTS – For each team member that summited.
1 POINT – For each  that each surviving player has.
X POINTS – For time taken. Where X is calculated by subtracting the number of hours tracked on the Time of Day Track from 24 and scoring the difference. For example, 24 - 18 hours = 6 points. Minimum score of zero.

**EXAMPLE:**
Red was 1st to Halfway Camp ascending, 2nd to the Summit, 2nd to Halfway Camp descending and 1st to Base Camp. They finished with 5 Karma. TOTAL of 25 points.
Blue was 2nd to Halfway Camp ascending, 3rd to the Summit, 3rd to Halfway Camp descending and 2nd to Base Camp. They finished with 9 Karma. TOTAL of 23 points.
Green was 3rd to Halfway Camp ascending, 1st to the Summit, 1st to Halfway Camp descending and 3rd to Base Camp. They finished with 8 Karma. TOTAL of 25 points.
In the event of a tie, whichever of the tied players was the first to the Summit wins – Green is the winner.

**EXAMPLE:**
A, B, C and D are playing.
Only C survives, but B, C & D all summited. C finished with 5 4 2 3 9. And the ascent and descent took a total of 21 hours, having left at 02:00 and flown home at 23:00.
“Royal blood runs through my veins, so I’m used to being at the top. I may be small, but I’ll tower over everyone when I’m at the Summit. And besides, the taller you are, the farther you fall. I’ll make sure of that…and yell ‘Bon voyage!’ as you go down.”

“Don’t let my constant smile and infectious laugh fool you, I’m all business, all the time. I’ve built my reputation with my kindness. And I’ve always looked out for the little guy. I believe in being the change I want to see in the world, even if that includes taking you out of it. This is just one more area for me to dominate, and I won’t let anyone stand in my way. I’ll leave no one else standing on this mountain. So watch out!”

“I’ve climbed the corporate ladder and shattered the glass ceiling, so now I’m going to conquer this Summit. I am too smart, cunning and witty to lose. The only thing I’ve ever quit are two husbands. I might die alone, but it won’t be on this mountain, kijk uit suckles.”

“My three kids have taught me many things. Stand strong, don’t back down and use as much heart as head. I love them more than life itself, and I promised them I would be first to the top. And I will be, even if it means no one returns.”

“Star athlete and competitive driver will be nothing compared to my certain victory in this race. Stay out of my way, because I can be colder than the mountain and more dangerous than an avalanche. The only time you’ll see me is when I pass your ascent on my descent. You don’t stand a chance.”

““You say young and small, I say full of life and nimble. You say inexperienced and naive, I say fearless and focused. You see a 15-year-old kid, but I am a fighter who has gone 12 rounds with cancer and come out on top. Be prepared to be surprised, because I’m going to show you drive and I will come out on top!”

“My three kids have taught me many things. Stand strong, don’t back down and use as much heart as head. I love them more than life itself, and I promised them I would be first to the top. And I will be, even if it means no one returns.”

“Don’t let my constant smile and infectious laugh fool you, I’m all business, all the time. I’ve built my reputation with my kindness. And I’ve always looked out for the little guy. **FAST PLAY SETUP**

The best way to learn Summit is to play it. Although there are a lot of options, turns can and should play fairly quickly. The first time you play or teach the game, the Character Mats may seem daunting. If you follow the setup below for any game mode, it’ll help get things moving and it will aid in teaching the game.

Once players have a round or two under their belt, everything will come together. Because you’ve set up everything for the other players, you can just explain the tile types and placement rules and then start playing.

**Cooperative/Solo Tweaks**

If using the Time of Day Track and leaving during the nighttime hours, remove one of the ⏳ Items above and replace it with the Headlamp Item. Also randomly place two Items in each active Sherpa's Item Slot. This will speed up the setup, and let players learn about new Items.

**ACKNOWLEDGMENTS**

None of this would have been possible without the love and support of my amazing wife Dominique, and my three fantastic kids: Kilianne, Caleb and Dahlia. To all my family and friends, old and new, who took the time to try out Summit in its various stages. To all the playtesters and proofreaders who helped to make this game the best it could be. And to all the amazing backers on and after Kickstarter who believed in me, and made my dream a reality. THANK YOU!

Thank you Greg, Joe and Stefan for your help before, during and after Essen. Thank you Jordan, Dan and Joel for doing what you do. Thank you Jackie and Dave for hosting months of playtests at The GameShelf. Thank you Thunder Games & Gifts for inviting me to Thunder Con. Thank you Red Lion Smokehouse for hosting playtests and the Kickstarter party. Thank you A-Game Cafe and Snakes & Lattes for hosting Summit events. Thank you to everyone in the media, locally and worldwide, who helped promote Summit. Thank you Northwestern Ontario Innovation Centre for helping Inside Up Games grow.

AND THANK YOU, FOR PLAYING MY GAME.

### PLAYER AIDS

- **AGGRESSION PACK** – More deadly Karma Cards.
- **ANYTIME** – Play Karma Cards, even when it’s not your turn.
- **BANDITS** – Players on, or passing through, the tile lose all Items.
- **COMPETITIVE** – Cards used for competitive play and Karma Cards affecting player’s Flag Tokens.
- **COMPONENTS** – Karma Cards affecting game components.
- **COOPERATIVE** – Cards used for cooperative play.
- **DOUBLE BLACK DIAMOND** – Very punishing Event Cards.
- **FOOD** – Individually tracked on Character Mats.
- **HEALTH** – Individually tracked on Character Mats.
- **ICE SCREW** – Players may increase  on this tile.
- **ITEMS** – Karma Cards affecting Items.
- **OXYGEN** – Tracked on Character Mat or dropped supply on mountain.
- **MOVEMENT** – Individually tracked on Character Mats.
- **PITONS** – Players may increase  on this tile.
- **SERAC** – Players on adjacent tiles roll Weather Die and lose 0, 1, 2 or 3 .
- **SHELTER** – Players ignore  requirements on this tile. (Not  requirements.)
- **SNOW CAVE** – Reduces all  requirements by 1 on this tile. (Not  requirements.)
- **SOLID GROUND** – This tile and adjacent tiles can no longer be affected.
- **STARTING ICON** – Used to set Character Mats and highlight starting Items.
- **SUNNY DAYS** – Event Cards for an easier expedition.
- **SUPPLY CACHE** – Players may gain up to  or  or  or  Items once per game.
- **THIN AIR** – Tiles now have an  requirement.
- **VERGLAS** – Player’s  is reduced by 2, to a minimum of 1 on this tile.
- **WEIGHT** – Individually tracked on Character Mats. Each token increases player’s  by 1.
- **WEIGHTLESS** – Each token decreases player’s  by 1.

### CLARIFICATIONS

- **ADJACENT** – Tiles touching on sides, not just corners.
- **BOMB** – First  affects current tile.  extends radius one tile away.  extends radius to two tiles away, etc.
- **CRUDE SLED** – If a blocking player refuses passage, that player must roll the Weather Die for damage instead.
- **ITEM DROP** – If an Item is dropped it is placed in an open Item Slot on the left side of the board and the Number Item Token is placed on that player’s tile.
- **ITEM LOSE/DISCARD** – If a player loses or discards an Item, it goes to the discard pile.
- **LOSE** – If a player is to lose a supply, such as , from a Karma Card, and doesn’t have it, their  is not affected.
- **MOVEMENT/TURN** – “Next movement” is different from “next turn” because the effect stays until the player moves.
- **REQUIREMENT** – If a player has a supply requirement, such as , from the Blizzard Track, and doesn’t have enough, they lose  per missing supply.
- **UP TO** – If positive, recipient decides. If negative, donor decides.
- **ROUNDING** – Everything is rounded down, unless otherwise noted. Bonuses and tweaks are applied after rounding.
